

REGULATIONS REGARDING TRADING OPERATIONS

These regulations set the guidelines for executing trading operations on DaoFinity, ensuring transparency, compliance, and fairness for all users.

1. General Provisions

- 1.1. Trading operations at DaoFinity are carried out exclusively through the online platform made available to clients.
- 1.2. The Client acknowledges that financial transactions involve significant risks, which may result in the partial or total loss of the invested capital.
- 1.3. DaoFinity is not responsible for investment decisions made by users, who are solely responsible for their operations.

2. Assets Available for Trading

- 2.1. The platform offers operations in the following markets:
 - Forex – Currency pairs with competitive spreads and adjustable leverage.
 - Cryptocurrencies – Bitcoin, Ethereum and other digital assets.
 - Indices – Major global markets such as S&P 500, NASDAQ and DAX 30.
 - Precious Metals – Gold, silver and other safe commodities.
- 2.2. The availability of assets may vary depending on market conditions and platform policies.

DaoFinity

3. Types of Orders and Execution

3.1. Market Orders – Executed instantly at the best available price.

3.2. Pending Orders – Include:

Buy/Sell Limit – Order is executed when the price reaches a pre-determined value.

Buy/Sell Stop – Order triggered when the price breaks a certain level.

3.3. All orders are processed based on available liquidity and market conditions at the time of execution.

3.4. In cases of high volatility or low liquidity, price slippage may occur, causing the order to be executed at a different value than that requested.

3.5. The platform reserves the right to cancel orders that have been entered under abnormal market conditions, technical failures or violation of operating rules.

4. Trading Hours

4.1. The markets operate according to the following schedules (UTC time):

Cryptocurrencies – 24/7 (continuous trading).

Metals – According to the corresponding exchange.

4.2. During periods of low liquidity (e.g. market opening and closing), spreads may widen and execution may be delayed.

5. Margin and Leverage

5.1. The platform allows the use of leverage, which increases market exposure with a lower initial investment.

5.2. The maximum leverage available may vary depending on the asset traded and the account balance.

5.3. The Client must monitor his/her free margin to avoid automatic position liquidations (stop-out).

5.4. The platform can adjust leverage levels at any time to mitigate financial risks.

DaoFinity

6. Stop-Out Policy (Automatic Liquidation)

6.1. If the account margin level falls below the limit set by the platform, open positions may be automatically closed to avoid negative balance.

6.2. The order of closing positions will be determined by the platform, considering factors such as liquidity and risk exposure.

6.3. The responsibility for monitoring the account margin lies solely with the Client.

7. Closing and Adjustments of Operations

7.1. The Client can close open positions manually or set take profit and stop loss for automatic closing.

7.2. During high volatility events (e.g. important economic news), prices may move rapidly, causing market gaps where stop orders may be executed at different prices than those stipulated.

7.3. The platform may make technical and financial adjustments to orders to ensure compliance with regulations and market conditions.

8. Error and Trade Cancellation Policy

8.1. In cases of technical errors, platform malfunctions or price transmission failures, the platform reserves the right to:

Correct entry/exit prices of affected trades.

Cancel orders that have been executed at incorrect prices.

8.2. If a Client identifies an error in the execution of their order, they must contact support within 24 hours for analysis of the case.

DaoFinity

9. Restrictions and Prohibited Practices

9.1. The use of abusive practices is prohibited, including:
Latency arbitrage (abuse of millisecond price differences).
Price manipulation or artificial liquidity.
Use of unauthorized bots or automations to operate on the platform.
Any attempt to exploit flaws in the system to gain undue advantage.

9.2. Accounts identified as engaging in such practices may be suspended or terminated without prior notice.

10. Changes in Regulations

10.1. The platform may modify these rules whenever necessary to reflect changes in market conditions or regulatory demands.

10.2. The Customer is responsible for periodically reviewing this document to be aware of updates.
